

Tannor Wallace
Full Stack Software Engineer

Caldwell, ID | (208) 258-0497 | [\[LinkedIn\]](#) | [\[GitHub\]](#) | [\[Portfolio\]](#)

Professional Summary

Full Stack Software Engineer with 7+ years building and shipping production systems. Strong in Python (FastAPI), TypeScript/Next.js, PostgreSQL, and end-to-end ownership—from API design and auth to deployment on Vercel and Render. Experience modernizing enterprise workflows, integrating regulated data systems, and delivering complete web products with role-based access, admin tools, and real user workflows.

Technical Skills

Languages: Python, TypeScript, JavaScript, C#, SQL

Frontend: Next.js, React, Tailwind CSS, TypeScript

Backend: FastAPI, Flask, Django, REST APIs, JWT Auth

Data: PostgreSQL, Microsoft SQL Server, SQLAlchemy, Alembic

Cloud & DevOps: Docker, Git, GitHub Actions, Azure DevOps, Vercel, Render, Supabase

Practices: System design, testing, Agile/Scrum, documentation, code reviews

Professional Experience

IT Engineer II (Software Developer) — Blue Cross of Idaho — Boise, ID

July 2022 – January 2026

- Led full migration from Tortoise SVN to GitLab with Python automation and SOPs; achieved **100% team adoption** and removed manual version-control overhead.
- Built Python automation and secure **API-to-API** transfers for Medicare/Medicaid and internal systems, improving reliability of member and claims data flows.
- Developed SQL stored procedures and real-time queries that cut manual processing and improved first-call resolution for customer service teams.
- Delivered tools for member data, coverage, and billing support used by on-call agents in a regulated healthcare environment.
- Owned end-to-end delivery of automation and integration work under compliance and data-integrity requirements.

Software Developer I — Ameriben IEC Group — 2019 – 2022

- Built and enhanced business applications with Python in Agile teams, shipping features that improved internal operations.
- Supported CI/CD and source control while improving test coverage and release reliability.

- Implemented data integration and automation that reduced operational overhead.

System Performance Technician III — Modis / Experis — 2010 – 2019

- Supported R&D and production systems, escalations, and ISO-aligned processes in enterprise environments.

Key Projects

Music Association of Canyon County — Community Platform | 2026

Next.js, TypeScript, Tailwind, FastAPI, PostgreSQL, Supabase, JWT, Vercel, Render

- Designed and shipped a **multi-role** production platform (public, member, admin) for a regional music organization.
- Implemented performance galleries with media, threaded comments, admin CRUD for performances/media/users, homepage announcements, member messaging, and sheet-music downloads.
- Built role-based API access, Alembic migrations, and cloud storage; deployed frontend and backend to production.
- **Live:** caldwell-symphony-frontend-taupe.vercel.app

Nails by Mykala — AI-Powered Salon App | 2025–2026

Next.js, TypeScript, FastAPI, PostgreSQL, Cloudinary, Grok Imagine

- Full-stack salon product with gallery, comments, admin tools, and AI nail-art generation.
- Owned design through production deploy on Vercel/Render.
- **Live:** nails-by-mykala.vercel.app

Enterprise VCS Migration — Blue Cross of Idaho | 2024–2025

- Python automation and process design that unblocked the department-wide move to GitLab and became the standard operating approach for the team.

Education

Full Stack Software Development Bootcamp — CodeWorks (Boise, ID) — 2019

Programming Certification — University of Phoenix — 2017–2018

Liberal Arts Studies — College of Western Idaho — 2012–2015
