Tannor Wallace

Software Developer

Caldwell, ID | LinkedIn | GitHub

Professional Summary

Results-driven Software Developer with 7+ years building scalable applications, automating complex workflows, and delivering high-impact solutions in healthcare insurance. Expertise in Python automation, SQL database design, API integrations, modern JavaScript frameworks, and Azure DevOps. Proven leader in system migrations, operational efficiency gains, and Agile team delivery.

Technical Skills

Languages: Python, JavaScript, TypeScript, C#, Next.js, Angular, Vue.js, jQuery

Frameworks & Libraries: FastAPI, Django, Flask, Node.js, Tailwind CSS, Bootstrap

Databases: Microsoft SQL Server, PostgreSQL, MySQL, MongoDB, SQLite

Cloud & DevOps: Azure DevOps, Docker, Vercel, Render, Cloudinary, GitHub, GitLab, CI/CD

Tools & Methodologies: VS Code, Visual Studio, PyCharm, Postman, Jira, Agile/Scrum, Kanban, MVC, Test Automation

Professional Experience

IT Engineer II (Software Developer)

Blue Cross of Idaho – Boise, ID

July 2022 – January 2026

- Led full migration from Tortoise SVN to GitLab, creating Python automation scripts and standard operating procedures that achieved 100% team adoption and eliminated manual command overhead.
- Designed and implemented Python tools delivering real-time member data to on-call agents, streamlining insurance coverage and billing support while significantly boosting customer satisfaction.
- Developed new features and proactive alerts to integrate evolving policy requirements, maximizing member benefit utilization for customer service teams.
- Authored secure SQL stored procedures and real-time queries to power call-flow automation and grievance/appeals processing, reducing callback volume and improving first-call resolution.
- Spearheaded secure API-to-API data transfer program connecting Medicare/Medicaid government endpoints to Blue Cross systems for sensitive member data.

Software Developer I

Ameriben IEC Group – Boise, ID

2019 – 2022

- Developed and integrated new features into core business applications using Microsoft technologies and Agile/Scrum methodologies.
- Managed source control and team collaboration via Azure DevOps, enforcing version control best practices.
- Performed thorough debugging and testing to prevent production issues and maintain high system reliability.

System Performance Technician III

Modis IT and Engineering / Experis – Boise, ID

2010 – 2019

- Conducted research, development, and ISO 14001 compliance testing while coordinating with local and international engineering teams.
- Managed multiple concurrent projects and resolved customer escalations from contractors to government agencies.

Projects

Nails by Mykala – Full-Stack Web Application

Personal Project | 2025–2026

- Designed and developed a complete full-stack web application for a professional nail salon using Next.js 16 (TypeScript + Tailwind CSS) frontend and FastAPI + PostgreSQL backend.
- Built an interactive gallery with swipe navigation, full CRUD comment system (with ownership permissions), and comprehensive admin panel for managing users, images, and comments.
- Integrated AI-powered nail art generator using xAI's Grok Imagine API to create custom nail designs on demand.
- Migrated image storage to Cloudinary for reliable, scalable hosting; deployed frontend on Vercel and backend on Render.

Education

Full Stack Software Development Bootcamp

CodeWorks – Boise, ID | 2019

Programming Certification

University of Phoenix | 2017 – 2018

Liberal Arts Studies

College of Western Idaho – Nampa, ID | 2012 – 2015
